### -Feeding Directions-

14% XL™ PELLETT is formulated for performances, broodmares, stallions and yearlings. This feed provides the extra vitamins and minerals needed for top performance plus **added fat for higher calorie intake and improved coat condition.**

#### Broodmares During Gestation:

Feed 1/2 to 3/4 lbs. per 100 lbs. of body weight per head per day in addition to free-choice hay or pasture.

#### Broodmares During Lactation:

Feed 3/4 to 1 1/4 lbs. per 100 lbs. of body weight per head per day in addition to free-choice hay or pasture. Adjust intake according to stage of lactation, pasture conditions and body condition of mares.

#### Mature Performance Horses:

Feed 3/4 to 1 1/4 lbs. per 100 lbs. of body weight per head per day plus hay. Adjust amount of feed according to work and activity level and desired body condition.

#### Yearlings on Pasture:

Feed 3/4 to 1 lb. per 100 lbs. of body weight. Adjust feed intake to achieve desired growth rate and body condition.

Always provide a source of fresh, clean water at all times. Bring horses on feed gradually over a 2 to 3 week period and follow good feeding management practices. Do Not Feed wet, moldy or insect infested feed.
